THE DILEMMA...

STARTING OUT IN
CYBERSECURITY AND
RUNNING INTO...
EVERYTHING IN ENGLISH?

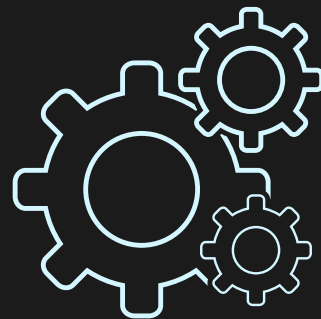

- WEIRD COMMANDS
- CRYPTIC DOCUMENTATION
- FORUMS THAT LOOK LIKE SPELLBOOKS

YOU'RE NOT ALONE!

REASON 1: KNOWLEDGE LIVES IN ENGLISH

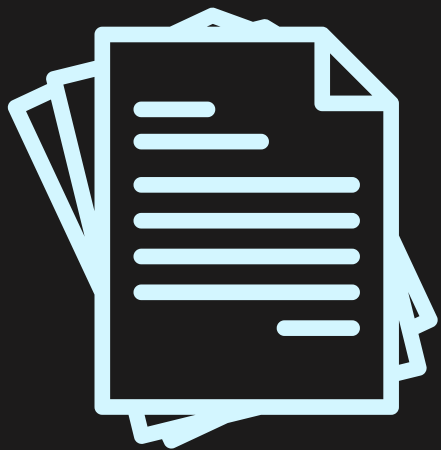

ALL THE GOOD STUFF SHOWS
UP FIRST (AND OFTEN ONLY)
IN ENGLISH, JUST LIKE...

- SECURITY ALERTS
- NEW TOOLS
- TECHNICAL GUIDES
- VULNERABILITY
REPORTS

REASON 2: IT IS THE LANGUAGE OF THE TOOLS

THE DOCS, ERRORS,
AND SETUPS FOR THE
MOST IMPORTANT
TOOLS ARE ALL IN
ENGLISH.

English >

AND YES — SO ARE THE BEST
TECH MEMES

REASON 3: IT IS A GLOBAL COMMUNITY

CYBERSECURITY HAS NO BORDERS.

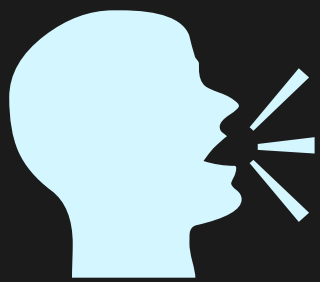

YOU COULD WORK WITH:

- AN ANALYST IN MEXICO
- A PENTESTER IN GERMANY
- A FORUM IN ASIA

THE COMMON
GROUND →
ENGLISH

DO I NEED TO SPEAK PERFECTLY?

YOU DON'T NEED A FANCY ACCENT OR SPEAK LIKE A NETFLIX CHARACTER

- JUST READ BASICS
- UNDERSTAND THE TOOLS
- SEARCH FOR ANSWERS
- GROW, ONE STEP AT A TIME

EACH NEW WORD = ONE MORE
UNLOCKED COMMAND

WHAT IF I'M JUST GETTING STARTED?

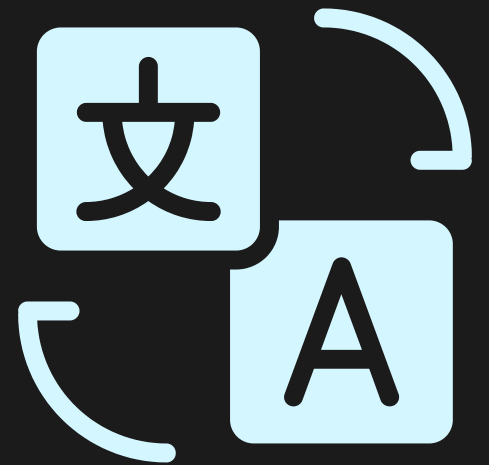

WELCOME TO THE CLUB.
